

Project Time Plan Tool

Manage your project time plan with this easy to use Gantt chart template. Free of charge!

This tool was developed to create a simple overview of project tasks in Excel shown in a Gantt chart.

The Gantt chart is in fact a two-color simple bar graph with horizontal orientation.

The first color of the bar is transparent and the second is (by default) greenish, this can be modified.

The visual impression is that only the activity period is shown.

No cells are protected, this template is open for modification.

Download the tool today and get on top of your time plan.
